

Executive Overview

GridPulse Infrastructure

The Infrastructure Layer for Intelligent Public Spaces

GridPulse deploys modular kiosks that unify shared charging, digital media, AI concierge, wayfinding, and venue analytics into a single software-defined platform managed through PulseOS.

Why Now

Guests expect continuous connectivity, static signage is converting to addressable digital media, venue operations are becoming software-defined, and AI now enables real-time operational optimization.

Platform Summary

GridPulse Hub hardware, PulseOS operating layer, Pulse AI intelligence, the GridPulse Network, a digital media platform, and enterprise analytics.

Five Recurring Revenue Engines

Battery rentals, digital advertising, enterprise software, venue analytics, and AI services.

Enterprise Commitments

99.95% fleet availability target, deployment in under 30 days, 100% over-the-air software coverage, and a 15-year platform roadmap.
